SELANGOR, MALAYSIA

Business Aircraft | Helicopter | Drone | Sports & Recreational Aircraft |
Seaplanes | General Aviation | MRO Services | Flying School

SELANGOR: PROPULSION FOR MALAYSIA'S AEROSPACE INDUSTRY

The aerospace and aviation industry has seen steady growth over the years, demonstrating its resilience and potential to create long-term economic value for the nation, despite current global challenges. To realise Malaysia's aspiration of becoming a leading aerospace hub in ASEAN, strategies were formulated to leverage Selangor's competitiveness as Malaysia's most progressive state to propel the industry forward.

Over 67% of the overall aerospace ecosystem in Malaysia is located and operates in Selangor. The state has established a strong and independent ecosystem, enhancing its ability to support the growing demand for the aerospace and aviation sectors, particularly in the Asia-Pacific region. Its unrivalled geographical advantages, industrial real estate, and infrastructure are complemented by a diverse talent pool, offering a transformational opportunity for global industry players to take their businesses to greater heights.

Recently, the Selangor State Government announced its plan to complement the aerospace and aviation expansion through the First Selangor Plan (Rancangan Selangor 1). This includes emphasising the Selangor International Aeropark (SAP) located next to KLIA Terminal 1 and Terminal 2.

The Subang Airport Rejuvenation Plans recently announced by the Honorable Transport Minister are welcome, and it is believed they will further propel Subang Airport. Plans to develop Subang airport to become a City Airport and to accept Regional Jets will invite more players in the MRO ecosystem in the near futures.

THE ONE & ONLY BUSINESS & GENERAL AVIATION SHOW IN THE REGION

Selangor Aviation Show (SAS) 2023 is a platform designed to bridge industries and relevant communities for an exploration of business and growth possibilities. Bringing together the world's finest under one roof, we create an avenue for thought leadership and learning opportunities that will redefine the aviation industry as we know it.

The one and only of its kind, this third instalment of SAS 2023 is a three-day event that will feature local and international exhibitors showcasing the latest innovations in the general and business aviation, helicopter as well as the drone sector. Be part of the discourse led by the industry leaders and experts focusing on unpacking challenges and future-proofing aviation to navigate the current times.

SAS 2023 is where the best converge, connect and collaborate in unlocking the potential of the aviation future.

Invest Selangor is a one-stop agency that provides informational and advisory services to potential and existing investors as well as assistance in setting up ventures in Selangor.

Recognising the importance of the aviation industry as a major economic lever, the agency initiated the Selangor Darul Ehsan Aerospace Industry Coordination Office (S-DAICO), a division entrusted with the mandate to lead the growth of the aviation industry in Selangor. S-DAICO plays a critical role in strategising, coordinating and delivering projects for the Selangor State Government, in collaboration with State Government Linked Companies (GLCs), the Federal Government and its agencies for the development of the aviation industry within the state of Selangor.

MAIN HIGHLIGHTS

SAS 2023 features the industry's brightest, latest and greatest at the heart of the event with a mission to elevate the aviation landscape of Malaysia.

1

Static Aircraft Showcase

Get up-close and personal with the technological marvels built to serve the growing global demands of air travel and transportations.

2

Exhibition / Showcase

Discover the latest innovations powered by digital and technology that will reshape businesses and experiences, changing the game of the aviation industry.

3

Forum & Sharing

Engage in dialogues with industry leaders and experts to gain insights on current trends, challenges as well as strategies in driving the growth of the global aerospace and aviation industry.

4

EDU Open Day

Explore new possibilities as you get to know more about learning pathways and opportunities in mapping your way towards a fulfilling career in aviation.

5

Networking Reception / B2B Meeting (Industry Players)

Be part of an exclusive networking avenue dedicated to industry players in pursuit of mutually beneficial partnerships.

6

Appreciation Dinner

Unwind with the company of like-minded individuals for a night to honour aspirations of excellence and future successes.
